## **Ninja H2 用 NASSERT-R Evolution Type II Limited production of orders !**

It will be the number of orders ordered by August 20, 2018.

Because this exhaust muffler is exclusively for closed courses such as stadiums, it cannot be used for general public roads.

- From the exhaust manifold part to the last tail pipe, made of heat-resistant titanium alloy (SUPER TIX® titanium pipe), we succeeded in weight saving while securing heat-resistant temperature.
- As for the silencer, the straight exhaust, silencer of the 350mm shell set two kinds of clear titanium and blue titanium.
- NASSERT-R Evolution Type II weighs about 16.6 Kg for normal muffler and 4.5 Kg for weight reduction of about 72%.
- Oil change and oil filter change are possible with the muffler attached.
- I adopt a 12-point titanium alloy bolt (green) to a silencer stay bolt and a silencer installation bolt.
- It is attached in a titanium silencer band (article not for sale) with the BEET carved seal which Kawasaki Team GREEN adopts.
- We will set two types for 2015 to 2016 and for OHLINS-Rear shock adjuster after 17- years.

Titanium alloy bolt

BEET mark titanium band

### 2015-2016 Model

<u>Clear titanium silencer specification</u>	<u>Part number 1002-B57-50</u>	<u>price ¥550,000-</u>
<u>Blue titanium silencer specification</u>	<u>Part number 1002-B57-BL</u>	<u>price ¥555,000-</u>

### 2017- Model (for OHLINS-Rear shock adjuster)

<u>Clear titanium silencer specification</u>	<u>Part number 1002-B58-50</u>	<u>price ¥550,000-</u>
<u>Blue titanium silencer specification</u>	<u>Part number 1002-B58-BL</u>	<u>price ¥555,000-</u>

※ Shipping will be scheduled for late November 2018. Thank you for your understanding.
